KATHLEEN FISHER was for 10 years the editor of *The American Gardener*, published by the American Horticultural Society. She was the author of *Herbal Remedies* and coauthor with Karan Davis Cutler of *Herb Gardening for Dummies*.

In anticipation of building a pond in my yard, I borrowed all the pond books from the local library. This was the best of the lot, so I purchased it. It really has just about everything you need to know about installing ponds and I keep referring back to it when I have a new question. I will keep it handy.

I want to put in a 15x30' pond. This book was only a little helpful. It did not cover well how to line a big pond, pumps required, power of pumps to lift water a long distance or up hill. I had a lot of questions and the book answered very few. Would I buy the book again. Likely yes. I have not found anything better and it did help me some with my planning...mostly it became clear how much I do not know and will have to find out from other sources.

This has a nice little history of ponds to start with (I like to have background history), then it shows in great detail how you can create your own backyard water pond. The illustrations are very pleasing, and the step-by-step is something that even \*I\* can follow. I think if I had an extra \$5,000 laying around waiting to be spent (yes the pool designs, while it doesn't give a price list for each item, you know it's going to cost a pretty penny), I'd start building one in our backyard tomorrow. I just need to convince my wife that water pond space is more important than land garden space.

Informative books. I landscape for work and am starting to have a collection of these book. Fast shipping and cheap pricing.

Very informative

Great book. Enlightening. Excellent format.

this book is great tells you a lot you need to know about ponds and plants and a lot more. I would

recommend this book to anybody.

Good book. Just as described.
