The book should be required reading for anyone who aspires to success in business. - Rick Coplin

As a twenty year veteran of enterprise software sales, this book provides a powerful framework for simplifying complex decisions. By applying these techniques, I'm sure we will make it easier for our customers to say, "Yes!"

Most of us have sat through an over-long presentation at some time. Either someone droning on at a conference, itemizing details to the nth degree when you haven't even grasped their central premise. Or a colleague making a pitch to your team that leaves you with more questions than answers. If these kinds of offenders had a copy of Mike Figliuolo's excellent new book, we'd all be a lot better off. A clear and compelling writer, Figliuolo outlines a nine-step process for crafting communications that will have heads nodding and everyone in the room grateful to be getting out of the meeting early. This is a quick and easy read that I devoured in an evening. The three messages

I loved most in this book, not least because they validate my own approach, are:1. Spend more time figuring out the right question to answer, before rushing into writing mode.2. Make sure you're addressing the "why," not just the what. (Nix all those facts and figures in reports--stick them in the appendix, where the numbers and fine detail wonks can find them. Mostly, the rest of us don't care.)3. Take a more scientific approach to your central hypothesis and try and prove yourself wrong. (This is counterintuitive, as Figliuolo points out, yet we all need to become more aware of our tendency toward confirmation bias.)What I especially appreciated, too, was how Figliuolo adds fresh nuggets to material we may have seen before. For example, how many times have we heard it stressed that to gain agreement or buy-in, we need to focus on what the audience cares about, not just what we want to give them? However, Figliuolo drills down even further with his "button" concept: "that metric or objective that makes your stakeholder sit up and take notice." He urges us to be sure we know which button to hit or, for more than one stakeholder, in what order. In short, Figliuolo offers a single, practical process for ensuring that approval for your ideas and recommendations becomes a snap. This is the third of the author's books that I've read and reviewed. In an age when many business book writers go on at length, giving too much information in one area and not enough in another, it's always a joy to read Mike Figliuolo. Plus, you get to see that he has put into practice exactly what he's teaching.

As CEO of a growing life science company, I am constantly looking for ways to simplify our core message to key stakeholders, investors, and potential customers. I am so happy that I was able to read "The Elegant Pitch" over the weekend. It made me realize how easy it is to fall into the trap of telling people everything you know, instead of telling them what they need to know to make a decision. Whether that ultimate decision I am looking for is to convince someone to make an investment in my company, or to purchase our products - this book serves as a communication road map to that destination. The principals that the author highlights are invaluable to both the experienced business leader, as well as the junior associate who is new to the team. The structured thought process for crafting a pitch is a crucial skill at all levels in an organization and should be the model for presentations in any type of organization - large or small. My company will be adopting this book as a guideline for presentations, so that we don't fall into the trap of including the kitchen sink in our presentations. This book is a must read for entrepreneurs, corporate managers, and even government and non-profit leaders. Let's end "Death by PowerPoint"... "The Elegant Pitch" is a great step in the right direction.
