Paul J. Feldstein is Professor and Robert Gumbiner Chair in Health Care Management at the Paul Merage School of Business, University of California, Irvine, a position he has held since 1987. He previously served at the University of Michigan as Professor in both the Department of Economics and the School of Public Health. Before that, he was Director of the Division of Research at the American Hospital Association. Professor Feldstein has written more 70 articles on health care as well as seven books, including *Health Policy Issues: An Economic Perspective on Health Reform*, 5e (2011) and *The Politics of Health Legislation: An Economic Perspective*, 3e (2006). During several leaves from the University, Professor Feldstein worked at the Office of Management and Budget, Social Security Administration, and the World Health Organization. He has served as a consultant to many government and private health agencies, an expert witness on health anti-trust issues--including the case of the FTC v. The AMA, which was decided by the U.S. Supreme Court--and as a member of the boards of directors of several health care firms. Professor Feldstein received his Ph.D. from the University of Chicago.

This book is verbose and has poor sentence construction which makes it a difficult read. New terminology and concepts are listed and never defined. I learned more from searching the Internet. As mentioned in previous reviews, the author is openly for redistribution of wealth and blatantly pro-government. It's required reading for my class or I'd return it.

I had to buy this text book for a class. I don't know if it is just the subject matter or the author but I feel as though it is written for those with more than a basic understanding of healthcare economics. Although the book is well written, it is very difficult to read and stay engaged in what they are trying to teach you.

Great text book. Very helpful

I would suggest only getting this book if you are going into economics of healthcare. I needed it for a special topics class and didn't even crack it open. Waste of money on my professors part.

Was very helpful in my class.

Detailed read and received in excellent condition

Good book for re-learning. Very understandable and easy to follow. Would recommend to any professor want to find a good text for their students.

Great Job I like the services you have provide and I would recommend to everyone that needs a book.
