# Coatings Tribology, Volume 56, Second Edition: Properties, Mechanisms, Techniques And Applications In Surface Engineering (Tribology And Interface Engineering)

## Synopsis

The surface coating field is a rapidly developing area of science and technology that offers new methods and techniques to control friction and wear. New coating types are continually being developed and the potential applications in different industrial fields are ever growing, ranging from machine components and consumer products to medical instruments and prostheses. This book provides an extensive review of the latest technology in the field, addressing techniques such as physical and chemical vapour deposition, the tribological properties of coatings, and coating characterization and performance evaluation techniques. Eleven different cases are examined in close detail to demonstrate the improvement of tribological properties and a guide to selecting coatings is also provided. This second edition is still the only monograph in the field to give a holistic view of the subject and presents all aspects, including test and performance data as well as insights into mechanisms and interactions, thus providing the level of understanding vital for the practical application of coatings. \* An extensive review of the latest developments in the field of surface coatings\* Presents both theory and practical applications\* Includes a guide for selecting coatings

## Book Information

Series: Tribology and Interface Engineering (Book 56)

Hardcover: 576 pages

Publisher: Elsevier Science; 2 edition (April 29, 2009)

Language: English

ISBN-10: 0444527508

ISBN-13: 978-0444527509

Product Dimensions: 6.7 x 1.2 x 9.5 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #3,738,800 in Books (See Top 100 in Books) #48 in [Books > Engineering & Transportation > Engineering > Mechanical > Tribology](#) #1726 in [Books > Science & Math > Chemistry > Industrial & Technical](#) #4233 in [Books > Engineering & Transportation > Engineering > Materials & Material Science > Materials Science](#)
