Dermatology Made Easy

Synopsis

Dermatology Made Easy is based on the hugely popular DermNet New Zealand website and is designed to help family physicians, medical students and dermatologists diagnose skin conditions with confidence. The book starts by providing a series of comprehensive tables, complete with over 500 thumbnail photos, to aid diagnosis according to symptoms, morphology, or body site. Once you have narrowed down the diagnosis, cross-references then guide you to more detailed descriptions, and another 700 photographs, covering:

- common infections
- inflammatory rashes
- non-inflammatory conditions
- skin lesions

Every section provides consistent information on the disorder:

- who gets it and what causes it?
- what are the clinical features and does it cause any complications?
- how do you diagnose it?
- how do you treat it and how long does it take to resolve?

The book concludes with a comprehensive section on further investigations and treatment options. Dermatology Made Easy combines the essential focus of the Made Easy book series with the authority and knowledge base of DermNet New Zealand's unparalleled resources. Printed in full color throughout.

Book Information

Series: Made Easy

Paperback: 412 pages

Publisher: Scion Publishing Ltd.; 1 edition (May 13, 2017)

Customer Reviews

Dermatology Made Easy by Dr. Amanda Oakley takes a novel approach to a persisting problem: how to teach dermatology efficiently to the beginner. Oakley leverages her unprecedented photo library to create a unique learner experience where words on a page are buttressed by hundreds of clinical images. Each section yields a different approach to her mission. First, she introduces the basics. She then takes an approach of grouping diseases by differential diagnoses first by

symptom, then by morphology, then by body site. Subsequent chapters revisit these conditions surprisingly thoroughly while maintaining brevity. The book is easy to read and easy to reference. It fulfills the need for a photo-intensive introductory text that leaves the reader with relevant pearls for diagnosing and treating skin disease. The book is broadly applicable and especially useful for dermatology medical students, residents from all specialties, and primary health care providers.-Jacob Levitt, MD, FAAD Professor and Vice Chairman, Department of Dermatology The Icahn School of Medicine at Mount Sinai, New York, NY, USA

Firstly Congratulations on this book. Clearly this is most logical conclusion to the yeoman work Dr Oakley has done with DermNet.org.I got the paper version, and I am truly gobsmacked by the amount of effort that would have gone into putting a book like this together.That she did a remarkable job goes without saying; that she did it while doing a million other things is more or less the Amanda we have all come around to expecting; but the fact that she did this alone is what is so truly mind blowing.I had to use it yesterday and was amazed at the logic that has gone into organising the book.This book is truly a tour-de-force.
