Age Range: 4 and up

Grade Level: Preschool and up

Customer Reviews

I've purchased several flash card packages from School Zone now, and they're just great! The cards are about the same card stock as playing cards, with one side shiny/laminated and the other side not. One thing I noted was that despite the "flimsiness" of the cards that other reviewers mentioned, these cards can take a beating - my two toddlers have bent, squashed, and thrown around these cards and amazingly none of them have torn! Even if they did, for less than \$2 a pack, it's not a problem. We like to hole punch a single hole in the corner of the card and keep them together with one of those circular binder clips - it keeps the cards together and we can just toss the whole pack in the kid's backpacks/in the car for them to play with when we go on trips. I mistakenly purchased these cards thinking they would be simple flash cards of animals for my kids to learn. To my surprise, not only were these cards showing a picture of the animal with the word on the front, but the back includes a lot of good information about animals that is a little bit too advanced for my kids - but great for when they get older. The photos are not particularly cartoony and are easy for my preschoolers to identify. Even though my kids are a little too young to understand all the information on the back, they are enjoying identifying the animals on the front! Highly

recommended!

Images of animals are pretty realistic compared to the other brands. A great variety of animals are represented from common pets like cats to farm animals like cows to zoo animal like zebras and to aquatic animals like the octopus. The name of each animal is listed with the image. Some facts about the animal are also listed on the back of each card. BTW, my packet came with the penguin and jaguar on front, not the dolphin pictured. This did not bother me any.... The dolphin is still inside on a card, just is not on the external cover. Only cons are:- two cards are generic "birds" and "fish." Either list a specific species OR include cards for all the general categories (mammal, bird, reptile, amphibian, fish, invertebrates).- most of the cards represent mammals. I would have liked to see more variety. Maybe the company could offer a second pack of cards with additional animals like invertebrates, more fish, fungi, plants, protist, bacteria, etc. Together these two packs would be AWESOME!

These cards are perfect. I have a 3 year old and a 15 month old and the 15 month old LOVES animals. I purchased these because I wanted to show her uniform images of different animals and everything I found were "clip art"-Esque images EXCEPT these! They are drawings, but are drawn realistically. The back also offers a lot of information about the animals. Absolutely perfect!

I bought these for my 2.5 year old. We are working on her learning more words. I love that on the back of the picture there are facts about the animal. This helps her to remember the animals. She likes to know what the animal eats. I ask her different questions, such as, "What do raccoons eat?" And she says, "fish". Some animals she doesn't know yet but I think with practice she should know them by the time she is 3. Flashcard cards work really well for us. It's fast pace, hands on learning. We get through a deck between 5 to 10 minutes. I try to do it 4 to 5 days a week with her in the mornings.

My 15 month old God Sun learned his letters and words with these cards, and now he is constantly talking. A great way to give your child or God child the early start to education

Very, very nice cards! But could you please make a laminated version. They are so nice and useable for many age levels. It is a shame that they can not take toddler's abuse. I will pay three times the money for laminated version with 5 star review.

I use these flash cards to help my Chinese students learn English. They have an animal for almost every letter of the alphabet and the pictures are cute.

basic flash cards with cute pictures
