Customer Reviews

Picked up some valuable lessons in this book. I particularly enjoyed the section on the Batman Walk. Although I have come across a similar exercise to this in the past, this is the first time that I have seen it framed that way. It is an interesting take. The author also talks about clearing limiting beliefs which is an important aspect that you can apply to your life even if you aren't trying to become a life coach. Overall very pleased with the book, there are many lessons you can apply to your life regardless if you are pursuing to become a life coach or not.

This life coaching book uses tried and tested strategies from the authors very own personal journey. At first glance some of the strategies he prescribes can seem daunting or uncomfortable, but as you read on you understand the concepts he employs are to really boost your confidence when dealing with clients and to help both you and the client relax and to let go of your egos. I've watched one of his confidence exercises being talked about on a TED talk and it's an exercise I use regularly day to day. To conclude, this book has some very actionable steps towards starting out as a life coach. The book includes activities to go through with clients and to practice on by yourself to help with future life coaching sessions. It's full of positivity and some great honest and personal touches from the authors own life.

As a trainer and part of the HR department of our company, coaching people is a part of our daily lives at work. You coached people not just about their work sometimes even about their own personal lives. Reading this book gave me a lot of ideas on how I can be a more effective coach at work and even outside work. It also helped me with understanding some of the issues I myself is going thru, like my hesitations in moving out of my comfort zone and just do what I always wanted to do. His words "being in the stuck in the middle of the fence and my fears stopping me from doing what I always wanted to do" kept repeating in my head. This book both inspired and challenged me to be a better version of myself. However, I saw some typographical error and grammar error though very few. Nevertheless, it's still an amazing book for me!

I have always had a passion for helping people and saving lives, so when I saw this book popped up on my I was very curious about becoming a life coach. This book has not only taught me the basics of being a life coach, but also excited my about the idea helping others achieve there dreams. This book contains powerful techniques to help yourself and others to achieve greatness. My favorite part of the book was when Zachary was talking about how doing the "Batman Walk" can make your day so much better. I also really enjoyed the "5 morning questions" that I should ask myself in the morning. I can't wait to start implementing some of these techniques into my life, and sharing them with my friends!
