Automotive Maintenance & Light Repair

Synopsis

AUTOMOTIVE MAINTENANCE AND LIGHT REPAIR (AM&LR) was designed to meet the needs of automotive programs that teach to the competencies specified in NATEF's Maintenance & Light Repair (MLR) program standard. Designed for entry-level students, the primary features of AM&LR are the focus on the foundational principles and knowledge for the MLR tasks, and the activities to supplement student learning. Both the core textbook and accompanying workbook provide activities covering the entire MLR task list, as well as many supplemental tasks often expected of entry-level technicians. In addition, Automotive Maintenance and Light Repair is written to engage students not just in automotive competencies, but also in applied academic skills and lifelong learning skills, including math, science, and communication.

Book Information

Hardcover: 816 pages

Publisher: Delmar Cengage Learning; 1 edition (March 27, 2013)

Language: English

ISBN-10: 1111307415

ISBN-13: 978-1111307417

Product Dimensions: 8.8 x 1.3 x 11 inches

Shipping Weight: 4 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Engine Testing and Service. 22. Engine Performance Testing and Service. 23. Automatic and Manual Transmissions. 24. Air Conditioning. 25. Vehicle Maintenance.

Rob Thompson has been teaching high school automotive technology since 1995. His teaching career began in 1994 as an adjunct faculty member at Columbus State Community College. Since 2007, Thompson has worked on numerous projects for Cengage Learning and is the author of AUTOMOTIVE MAINTENANCE & LIGHT REPAIR. He has served on the board and is a past president of the North American Council of Automotive Teachers.

Although I have only overviewed this e-book my main concern was that the media, such as pictures, graphs, diagrams, etc., were going to be missing as they sometimes can be from the kindle versions. But this e-book is complete and feature rich. It is huge with over 800 pages and lots of reviews and summaries. It is a complete introduction to Auto Maintenance and Light Repair and at a third the price of the hard cover I highly recommend it if you are training for the ASE certification or as a reference to the subject. Cool book.
