Vaccine Whistleblower: Exposing Autism Research Fraud At The CDC

Synopsis

A Firsthand Account from a CDC Insider on the Link between Vaccines and Autism Vaccine Whistleblower is a gripping account of four legally recorded phone conversations between Dr. Brian Hooker, a scientist investigating autism and vaccine research, and Dr. William Thompson, a senior scientist in the vaccine safety division at the Centers for Disease Control and Prevention (CDC). Thompson, who is still employed at the CDC under protection of the federal Whistleblower Protection Act, discloses a pattern of data manipulation, fraud, and corruption at the highest levels of the CDC, the federal agency in charge of protecting the health of Americans. Thompson states, "Senior people just do completely unethical, vile things and no one holds them accountable." This book nullifies the government's claims that "vaccines are safe and effective," and reveals that the government rigged research to cover up the link between vaccines and autism. Scientific truth and the health of American children have been compromised to protect the vaccine program and the pharmaceutical industry. The financial cost of the CDC's corruption is staggering. The human cost is incalculable. Vaccine Whistleblower provides context to the implications of Thompson's revelations and directs the reader to political action.

Book Information

Hardcover: 176 pages

Publisher: Skyhorse Publishing; 1 edition (August 20, 2015)

Language: English

Customer Reviews

"You've had a definitive test as far as I'm concerned regarding Thimerosal safety. I mean, that study that Bill Thompson performed at the CDC in 2007. It was published in the

New England Journal of Medicine.[It] was a wonderful study. I think that stands as a definitive study. DR. PAUL A. OFFIT, the Children's Hospital of Philadelphia, interview in the film Trace Amounts; I don't know why they still give it [flu shots with Thimerosal] to pregnant women; that's the last person I would give mercury to . . . Thimerosal causes tics . . . do you think a pregnant mother would take a vaccine that they knew caused tics? . . . Absolutely not! I would never give my wife a vaccine that I thought caused tics. DR. WILLIAM THOMPSON, CDC senior scientist, author of multiple studies used to claim Thimerosal is safe, recorded phone conversation with Dr. Brian Hooker, May 8, 2014; Now, we all know that vaccines can occasionally cause fevers in kids. So if a child was immunized, got a fever, had other complications from the vaccines. And if you're predisposed with the mitochondrial disorder, it can certainly set off some damage. Some of the symptoms can be symptoms that have characteristics of autism. DR. JULIE GERBERDING, CDC director (2001-2009), president, Merck Vaccines (2009-present), interview with Sanjay Gupta on CNN, March 29, 2008; The CDC can't solve a problem they helped start. It's too risky to admit they have been wrong about mercury/Thimerosal. They are corrupt. JIM CARREY, actor, via Twitter; It's hard to defend any of these actions [described by Dr. William Thompson about the internal workings of the CDC] and I am troubled because I worked hard with distinguished partners over six years to significantly increase the effectiveness of CDC vaccine safety. My efforts were rejected by both Bush and Obama [administrations]. The Thompson material is an incident and without support from his old or current colleagues will not motivate the CDC [to] reevaluate its program. I will continue to follow developments. We all know that the child vaccine program has significantly increased and that there are some children who will be affected. Predicting who is the ongoing challenge for the CDC and FDA. BOB WRIGHT, cofounder and chairman of the board of Autism

Kevin Barry, Esq. is the father of three sons, one with regressive autism. After receiving his JD from the Hofstra University School of Law, he worked at the US Attorney's Office for the Southern District of New York in the civil division. Mr. Barry is currently copresident of the Elizabeth Birt Center for Autism Law & Advocacy. He is also the president of First Freedoms, Inc., a nonprofit organization dedicated to advancing the freedoms guaranteed by the first amendment of the Constitution. Mr. Barry is the former president of Generation Rescue. Robert F. Kennedy, Jr., JD, LL.M., is senior attorney for the Natural Resources Defense Council, chief prosecuting attorney for

the Hudson Riverkeeper, and president of Waterkeeper Alliance. He was named one of Time magazine's "Heroes for the Planet" for his success in helping restore the Hudson River, and he continues to fight for environmental issues across the Americas. He is the bestselling author of Crimes Against Nature. Dr. Boyd E. Haley is the former chairman of the chemistry department at the University of Kentucky, where he taught chemistry and biochemistry.

It was not hard read this book in one sitting as it soon became clear that it is one of the most important pieces of evidence of CDC malfeasance that we have seen yet. However it still seems that an agency that has been accused by one of its own top scientists, of wrongdoing and fraud against our CHILDREN is not enough for the American people to stand up and be outraged. Why is that? Whatever your stance on vaccines, the only people who DON'T want an investigation into this are the hardline pro-vaccine movement. Everyone else (reasonable parents, questioning parents, doctors, pro-science minded people and vaccine injured) should WELCOME further investigation? I mean, why not? Safety should be first. It is naive to think that an industry which has already been embroiled in CRIMINAL charges in the US and worldwide, would be so squeaky clean when it comes to vaccines. Barry does a great job of analyzing the situation as a reasonable person. Even the foreword by RFK Jr is more damning in its depiction of the malfeasance at the CDC. Kennedy produces a scathing report of the state of this crumbling agency and the reasons why the American people should wake up. He singles out the media as being complicit in this crime against our children and the health of future generations. After reading this book, it begs the question, why do PRO vaccine hardliners ignore this blatant corruption unless they are part of the pharma paid propaganda machine? If they're not getting paid then they're being foolish (I mean, why else would you spend countless hours online to defend this multi billion dollar industry?). What is the argument AGAINST a congressional hearing? If the CDC has nothing to hide then let's subpoena them. I saw that Ms Reiss (comments below) thinks that Rep. Posey should release the documents if they are so conclusively damning but she is naive herself or she is just so stuck on the flawed seat belt analogy that she can't see it (clicking into a seat belt cannot cause brain injury). Publishing whistleblower documents of a government agency is not an official role of his. It must be done via a congressional hearing and go through the correct channels. If people like Ms. Reiss took a step back and remember that we were once convinced by the SCIENCE, doctors and the government that smoking was GOOD for us, she would see that this is no different. The ONLY study we will accept, as reasonable people, is the study of vaccinated Vs unvaccinated which we CAN do by obtaining access to the SEED data currently being held "under lock and key" by the CDC. This

study is the only one that can truly examine the health of our children post vaccination and not rely on "studies" carried out under suspicious circumstances (Verstraeten Thimerosal study, 2004 MMR study, the Danish studies etc). All of this can go away if we have new and INDEPENDENT studies. It seems that Dr. Thompson himself wants the SEED data to be given to independent bodies to study. Why is this so difficult? Well it's so difficult because we are up against a multi Billion industry and much like the reason why the multi billion dollar National Children's Study was abandoned (and never even included vaccines) - they are afraid of what they may find (or have found). This is not going away. More and more kids are being harmed each day... drip drip... but soon the tsunami will arrive at the shore. And then it's too late. All. Over. The. (vaccinated). World. Barry's book will be a watershed moment, sadly another one, where the mainstream media turned a blind eye to what's proving to be the crime of the 21st century.

This VERY important story and one that every news agency should have given time to but did not. That begs the question "why?" The answer to that question is disturbing. A must read for anyone concerned about health since the very agency that is supposed to be protecting health has committed fraud, hiding statistically significant findings substantiating a link between the MMR vaccine and autism. Go figure! Frankly, this story makes me furious, furious that have been lied to.

This book contains the complete transcript of the legally taped conversations between Dr. Hooker and Dr. William Thompson, CDC scientist and whistleblower. Dr. Thompson was author of the studies that the government continually uses to assure parents that there is no link between autism and vaccines. He now alleges that those very studies were manipulated and fraudulent, intentionally managed so that parents were not told the truth - that vaccines can, and do, cause autism. The book also explains how the organization Autism Speaks, which assures parents repeatedly that autism is a genetic condition that has nothing to do with vaccines, is a front for the CDC, funded by the very same people and acting purely as spokespersons for the CDC and pharmaceutical agenda. Before Big Pharma sends people here to post one star reviews and cry 'debunk', be aware that this case cannot possibly have been 'debunked' - the case has not been even heard, in spite of requests from Congressman Posey to members of Congress to read the thousands of documents that he has obtained under the Freedom of Information Act to support Dr. Thompson's claims. Shockingly, even to those who knew about this case for over a year, the book reveals how the government has helped manipulate the media by instructing them to not give 'weight' to any scientist who questions vaccine safety. Many of us have known for years that the media will attack anyone who questions

vaccines because they rely on Big Pharma advertising revenue, but this book pulls pieces together to help the reader understand just how deep this corruption runs, and how so many pieces of the puzzle fit together. The book is easy to read, and lays to rest the media claims that the CDC Whistleblower is 'debunked' or a trivial matter. Because much of the book is a direct transcript of various phone conversations, it is sometimes a little confusing, but the author then does a good job of giving an overview of the whistleblower case. It will now be interesting to see how this story progresses. The author's plea is that parents, outraged by this intentional policy of lies and deception, spread the story themselves, through social media and word of mouth. For sure, mainstream media won't touch it, and if they do, they will pay lip-service to their Pharma masters. Just watch these reviews! This book was only just released, but I'm betting that within a few days, there will be dozens of Pharma tools on here giving one star reviews and crying 'Debunk!'.

Great read. The transcripts of the conversations between Drs. Hooker and Thompson provide quite an understanding of how very deep this rabbit hole may go. Sadly, there is no room at the "pro-vaccine" table for those of us who are pro-vaccine safety. Thus you find us intermingled among the truly and unabashed "anti-vaxers". But I'm finding that the labeling, name calling and attempts to dismiss and marginalized us safety folks, has far less traction of late... Demographics are determinative, and those deciders who have demonstrated a reckless disregard for vaccine safety may, in fact, be the engine that drives their impending fall from grace.

A must read for parents considering vaccinating their children
