The Sowilo rune is carved in a mirror image of what it should be. (At least it wasn't Eihwaz, thank goodness.) It's a shame, because other than that, it's a very nice set. The runes are flat and large enough to read clearly without straining. They are rather heavy, so those who prefer to cast runes from a long distance above the table might want to opt for something lighter. While I had previous experience with runes when I got this set, I do have to say that the LWB (instruction booklet) that comes with these is going to be pretty worthless for a beginner. It's also inaccurate in that it presents the blank rune as a historical thing. If you're willing to risk getting backwards runes, toss the booklet that comes with these and get something decent that wasn't derived from Ralph Blum.

They weren't as flat as what was pictured, I was a little disappointed with that...some were quite rounded and small, actually..but I love hematite..and all the runes were there, and etched well, and

they looked very nice. Overall i was happier with this purchase...i have previously bought the wooden runes from the same company, and they werent as well made, and had one of the runes mis-sketched, so i checked each one of these, and they all looked good, so im happy.

I just got these delivered today, and the package contained almost exactly what I expected. They are very pretty, shiny, gray hematite stones, engraved with the Elder Futhark, and one extra, that I tossed into my junk drawer, should I ever need to replace one. They are varied in size, while the photo led me to believe that they would be fairly uniform and more "domino-like" in shape. The stones are packaged in a cardboard box, and in a small black velvet-like bag inside the box. They seem to be of a fairly high quality, considering the pricing. I'm a little skeptical about the bag and will probably replace it eventually. The stones themselves are varied in size and shape, but all are able to lay down on their faces and are "more or less" cube-shaped. Futhermore, with my limited experimentation so far, they seem to be effective, so overall I am quite pleased. And the package arrived two days ahead of schedule!

Not hematite, these gray stones looked more like magnetic stones, which they also were not. There were stones missing and one duplicate. I won't be sending them back, but I also can't use them for their intended purpose. I'll keep them for my kids to play with, and for that I likely over paid. The book is okay, VERY basic, but who cares, you can get better info free on line. The bag is junk, so be ready to get a new one if you buy this set. Sometimes you get luck with low priced stuff on , this time I did not.

These were purchased as an additional set to one I have used for years. All in all these are far better than the other blue onyx set I purchased as a gift. This manufacturer appears to have a few different carvers and the carvings on these are far better than they were on the blue onyx. The stones are in better shape as well although there were a few that had some rough spots. As a backup set for me they will do just fine but will certainly not replace my primary set. Overall they are decent quality and the staves look pretty decent.

Horrible looking with so many scratches. By the time I received the runes I was no able to get the full amount of what I paid If I wanted to returned them.I was able to get only half of my money. Never again.

Easy to read. Grounding and well carved. Good price!

These hematite runes are fantastic!!! You can see their symbols very clearly & the stones themselves are big, smooth & flat, making any reading for a client or friend easy easy. I highly recommend them for anyone into Runes!!!
