Our FAScinating Journey: Keys To Brain Potential Along The Path Of Prenatal Brain Injury, Second Edition

Synopsis

Our FAScinating Journey will introduce readers to another winding path in working with prenatally exposed children. Jodee illuminates this path with lights that shine the hope of possibilities for these special kids. On your journey through these pages you will: • Discover creative approaches in reaching and loving children with attachment issues. • Understand how alcohol affects the growing brains of children. • Become familiar with brain terminology. • Uncover ideas to help a child nutritionally. • Wade through school and behavior issues with tears, laughter and strategies you may not have tried. • Meet professionals who have helped the Kulp family help Liz grow. • Loose yourself in a myriad of ideas within the appendix. • Smile as you get to know Liz, a very real teen who is determined to be the best she can be inspite of FASD. Our FAScinating Journey: The Best We Can Be, Keys to Brain Potential Along the Path of Prenatal Brain Injury is written for families, professionals and the community. It’s goal is to open the door to possibilities for our citizens who have sustained brain injury due to toxins in the womb. While this is Liz Kulp’s story, our hope is to open doors for you and your child. We want to help your family become strong and united rather the divided and fall. We want to provide your child "a chance to grow!"

Customer Reviews

Our FAScinating Journey provides a wealth of knowledge and practical experience for helping youth with prenatal brain injury. -- Susan Carlson, Minnesota Organization on Fetal Alcohol Syndrome, Forner First Lady Minnesota, February 2002
Parents and providers alike will enjoy this enlightening

book -- Teresa Kellerman, Director, FAS community Resource Center, February 2002

In 1999, at age twelve, Liz was diagnosed with FAE - permanent neurological brain damage due to prenatal exposure to alcohol. For her family, it was the answer to many unanswered questions regarding her behavior and abilities. For Liz, it was an opportunity to begin to learn to cope with her disability instead of believing she was "bad." Liz takes you on her journey as a young teen through the murk and mire of misunderstandings and confusion. Through the distortions and discombobulation of living with a miswired brain and a compromised body in a covering of flesh that looks like nothing is wrong. --This text refers to an out of print or unavailable edition of this title.

This is a very informative book for understanding FAS.

Your books are fantastic, I would love to translate them into German and get them into circulation in Germany. You have great tips in every direction and every life-situation, whether it's nutrition, school and learning, therapies, you name it, you've got something to say. What an inspiration! God bless you.

I am a mother of several children with FASDs. This book is the best resource I have found. Concrete, usable information, an inspirational, overall winner!

Exactly the book I need to help me with a child I'm working with.

This handbook is a great information resource for any family, person or group with questions regarding FASD and its associates. Put it at the top of your list!

This is one of the most practical guides to therapies and treatments for FAS. There are references for physical therapies, sensory therapies and food allergies. Jodee and her daughter have tried to collect all their experiences to make them available to other families so that they do not have to "reinvent the wheel". The companion book, **All That I Can Be** by Liz Kulp is perfect for teenagers who want to know what FAS is all about.

a excellent resource!

This is a great book. I would recommend it to anyone whom lives with FASD. Full of information.
