Age Range: 2 - 5 years

Grade Level: Preschool - Kindergarten

Customer Reviews

Fhiona Galloway has been a freelance illustrator for many years and has enjoyed illustrating for a wide base of clients, including many children's publishers, which she loves. She lives in the west of Scotland with her husband, daughter and giant schnauzer and when she's not working, likes to spend time walking, watching films and reading. Jonathan Litton has written numerous children's books in prose and verse. He loves using his science background to write about sea creatures, space and saving the planet, but is also fond of penning stories about pirates, princesses and picnics. When not writing, he can usually be found on his bike. --This text refers to an out of print or unavailable edition of this title.

I like that the book teaches half past, quarter past, quarter to, etc. as those are typically harder phrases for a child to get. It also includes the digital times in the bottom right for comparison. You can check how you set the clock to the text as there is a small clock in the left side of the page spread. Also like that the clock can be used without opening the book so it can be used for quizzing

on time or using in time projects. What I did not like was the book never taught that the short hand pointed to the hour and the long hand to the minutes and that hours are listed first etc. This seems like such basic things that I am surprised it was not outright taught in the text. Also did not teach am/pm, 24 hours in a day, etc. This is why the book lost 2 stars. Also, our family schedule (and no one else's I know about) matches the book's times in any way... I work evenings so our entire schedule starts at 9:30 am not 7am. My friends work during the regular workday, so they get up between 5-6am. But, I understand the book had to choose a general schedule time-frame to reference to... so its only a minor issue. But it is something you should be aware of - that the schedule will not match whatever you do at home.

Such a cute and entertaining book. My 7 year old wanted a clock to move for telling time and now she enjoys reading this book to her little sister and being able to use the clock as a toy on its own with the book closed.

Very cute book for those little ones interested in time....my 4 year old grandson likes to move the hands.

This book is adorable and much bigger and sturdier than I had expected. A great way to introduce telling time and clocks to little ones.

Great book!
