Workbook For Sectional Anatomy For Imaging Professionals, 3e

Synopsis

This workbook uses an integrated approach to learning sectional anatomy and applying it to diagnostic imaging. It facilitates comprehension, learning, and retention of the material presented in Kelley's Sectional Anatomy for Imaging Professionals, 3rd Edition. In addition to fill-in-the-blank, matching, multiple-choice, true/false, puzzles, fill-in-the-table, and short-answer questions, this new edition includes 300 illustrations from the main text for labeling practice. Three post tests cover neurologic, body, and extremity content, offering additional opportunities for readers to test their comprehension. Chapter objectives focus your attention on the important concepts you are expected to master by the end of the chapter. A variety of engaging exercises, such as matching, true/false, fill-in-the-blank, fill-in-the-table, and labeling aid your learning and retention. Memory learning aids, such as mnemonics, help you memorize quickly so you can concentrate more on applications of concepts. Updated material corresponds with updates to the main text. More cross-reference images and anatomy maps have been added for additional guidance in labeling exercises. Additional exercises reinforce the relationship of specific structures to surrounding anatomy.

Book Information

Paperback: 256 pages

Publisher: Mosby; 3 edition (May 10, 2012)

Language: English

ISBN-10: 0323094198

ISBN-13: 978-0323094191

Product Dimensions: 10.8 x 8.4 x 0.5 inches

Customer Reviews

Wonderful addition to the main book. Used this to help with my studying.

This workbook is really awesome. It contains mix & match questions, case studies, fill in the blank and so on. I found it to be really helpful however it is best to purchase before the semester starts so

you would become more familiar with the images when your anatomy course starts. I did not have money to purchase the textbook but I was able to test myself on the work I did in class and additional notes from other textbooks. I was able to spot my weak areas and also correct my own work since all the answers were at the back. I actually like workbooks that has all the answers and not just list a few answers that way you can correct your own work and not have to bother the teachers. Again, really nice book, the book did not have any pencil or pen writing in it, looks fairly new and the delivery time was not bad at all.

brand new! shipped fast as well.

I enjoy this book, I learned a lot from it. Taking into account my instructor was on point.

It is an exercise book with multiple types of questions. The main book does not have any exercises. Questions are of type (list..., match..., choose..., identify...,etc). As far as I saw all the questions in the workbook answered in the book.

good review material

Good and helped me with my Radiation therapy registry.

Great workbook, Fast shipping. Thank you
