McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

I bought this to try because the older Harcourt textbook we are using to homeschool is full of minutiae that I don't think any 5th grader could be expected to retain, but this is at the opposite extreme... very skimpy. The U.S. Constitution and early government gets 14 pages in Timelinks, 33 in Harcourt. Sometimes you want streamlined info as a memory aid, but it can also make it quite dull. I know my son won't remember much of the detail, but it makes for more interesting reading. However, many homeschoolers want a basic outline that they can supplement themselves, so this might do the trick. Just don't expect too much. Also, please note these come in 2 volumes. Don't know why they need to, since they're under 200 pages, but this volume covers the founding of the U.S. to the war on terror (yep, in under 200 pages!)

We really liked the last edition of this textbook. This version is organized more on historical timeline

rather than the older version of which was organized on regions. I think the organization change is good but the meat of the textbook seems to be lacking. To me, it appears that content has been watered down a bit in this edition.

Perfect for our home school

It was in great shape.

Great book!

fast service very happy
