National Geographic Readers: Planet Earth Collection: Readers That Grow With You

Synopsis

Powerful weather, bursting volcanoes, sparkling gemstones, and more will fascinate science and fact-hungry kids. Experience the whirl of a hurricane, dig deep and learn about the rocks that make up our planet, and discover the amazing feeling of a rainstorm. National Geographic Kids brings readers some of their reader's favorite science topics in one convenient package. Fascinating science information is accompanied by wonderful photographs to ensure that kids' natural curiosity is both satisfied AND inspired.

Customer Reviews

KATHY WEIDNER ZOEHFELD (Rocks and Minerals) is a graduate of Mount Holyoke College in South Hadley, MA, and University of Michigan Ann Arbor where she decided to put her science degrees to work by writing nonfiction books for kids. Since then she has written more than 60 natural science and history books for young readers, and been awarded honors by the NSTA/CBC, NCSS/CBC, the AAAS, the ALA, and the IRA/CBC Children's Choice. ANNE SCHREIBER (Volcanoes) is a graduate in Science Education from Cornell University and began her career as an elementary school teacher. She wrote the science content for the Magic School Bus television

series and more than a dozen books for young children. Kristin Baird Rattini (Weather) has explored subjects ranging from Star Wars to Stonehenge to amazing animal pals. She is a frequent contributor to National Geographic Kids magazine. Miriam Goin (Storms)

My kids are fighting to have it ... The info in these small booklets is easy to understand .. They know more than me now .. It's beautiful ..

My son especially enjoys the jokes - think "what is a tornado's favorite game?...twister!"

Great book for 1st or 2nd graders!

My 7-year-old loves it. He's very interested in how things work, science, earth, space, etc... This book held his attention for awhile.

The book compiles all weather lectures into one book. Great read for second graders not too much words to overwhelm kids and great realistic illustrations.

I gave this to my 7 year old grandson for Christmas. He loves this book. Took it to first grade for show and tell.

My son is 7 and really enjoys this book along with all the other National Geographic books. Good information without being overwhelming. My son is in the gifted classes in first grade and this book suited him just fine.

Very informative and provoking inquiry. As NatGeo publication is features stunning photos, but what is really great is that complex concepts are easily understandable. Next question: What is causing wind?
