Jack Goodwind does it again. His imagination blows me away. This was a much shorter installation than the first book, but it left me ready for the rest of the story. This book draws you in and leaves you wanting more. What's going to happen to Major Joe Evans? I can't wait for the next installment of this saga.

I'm not sure how i feel about this series yet, the books are short and when the story gets moving they end. They are interesting but they need more story.

Another great read from Jack Goodwind!

An OK read. DHD

An excellent representation of a science fiction story with unexpected turns and a gripping plot. Major Joe Evans is a very interesting character, a soldier who leads his team on the mission to the Moon and back, making a fascinating discovery and bringing home something that you would never expect. Something that would change the course of history. Something that was lost for a long time. Twists and unexpected turns of the events in this story are on every page. You just have to keep turning the pages and it leaves you wanting for more. It leaves you with the question: What comes next?
