Rich and Sue Freeman, decided to make their living from what they love-being outdoors. In 1996 they left corporate jobs to spend six months hiking 2,200 miles on the Appalachian Trail from Georgia to Maine. That adventure deepened their love of the outdoors and inspired them to share

this love by introducing others to the joys of hiking. Since most people don't have the option (let alone the desire) to undertake a six-month trek, they decided to focus on short hikes near home. The result was the first edition of "Take A Hike! Family Walks in the Rochester Area." They went on to explore hiking, bicycling, skiing, and snowshoeing trails, waterfalls and now waterways for paddling throughout central and western New York State. They have written 10 guidebooks. Rich and Sue are active members of several area outdoors groups. In addition, their passion for adventure continues. They have hiked the 500-mile-long Bruce Trail in Ontario, Canada, hiked on the Florida Trail, hiked across northern Spain on the Camino de Santiago Trail and hiked a 500-mile section of the International Appalachian Trail in Quebec, Canada. They have trekked to the top of Mt. Kilimanjaro, the highest mountain in Africa. Recently (in addition to kayaking hundreds of miles of New York's waterways), they hiked the tropical forests and volcanic peaks of wild Hawaii. On bicycles they have crossed New York State on the Erie Canalway Trail and pedaled the C&O Canal Trail from Washington D.C. to Cumberland, Maryland. The Freemans regularly present slide shows about their adventures. For the current schedule see Event Schedule. They also publish a free, monthly electronic newsletter on outdoor recreation in central and western New York State. Since beginning their new careers writing and publishing guidebooks, the Freemans have pared down their living expenses and are enjoying a simpler lifestyle. They now have control of their own destiny and the freedom to head into the woods and waterways for a refreshing respite when the urge strikes. Still, their life is infinitely more cluttered than when they carried all their worldly needs on their backs for six months on the Appalachian Trail.

My husband have this book and, "Take a Paddle: Finger Lakes NY Quiet Water for Canoes & Kayaks". We really like both books. They have many great features, including a map in the front that indicates the location all the reviewed areas, (we start here to decide how far we want to travel) different places for put in/take out, (including the amount of parking available and whether there's a fee to park) interesting facts, (ie: the release of river otters in one of the lake outlets, along with a website to go to report if you see one during your paddle) and great safety info. We are new to kayaking, so the safety info has been very valuable ... we would have found out the hard way how much a lake can change - challenge wise - if wind kicks up but thanks to this book there were no surprises. Our last time out was a hot day, so we intentionally chose a lake the book warned could become quite choppy. When we got there the water was like glass, but we stuck close to shore just in case and sure enough, on our way back a breeze kicked up, and it was amazing to see how quickly the lake turned into whitecaps! Since we had planned for this, we enjoyed riding the waves

and getting wet from the ones that crashed over our boats ... but if it had been a cold day or if we had strayed too far offshore, this fun adventure could have turned into something far more dangerous. But whether you are a new or experienced paddler, these books have lots of great info that make them worth the money.

This book is helpful to know where to go, where to park, best time of the year to paddle where, amenities available, and how difficult of a paddle it is. I have the one for the finger lakes area and have found it to be a great tool to use in new areas. The only bad part of the book is that it was written several years ago, so Mother Nature has made some areas are more choked with weeds, or are not in the same shape they were ten years ago. Still, it is pretty accurate.

My wife and I bought this book and our canoe in the same week. Coincidence? I don't think so. This book offers families a great chance to get outside and share time together. The rating system is outstanding and the directions are great. This is the type of book that screams out for a second volume I would gladly volunteer to be a guest contributor should the authors ever decide to do a second volume.

The directions in this book to get the various locations are confusing and poorly written. The sites to put in at are inaccurate or difficult to find. Book is very disappointing . don't waste your money.

Great info, just wish someone updated it. Still good guide.

I borrowed this book from the library and just couldn't get enough. I am excited to check out all the locations in the book. Those that we have tried are as described. I am thankful for this reference!
