Average Customer Review: 4.5 out of 5 stars 201 customer reviews

Best Sellers Rank: #8,356 in Books (See Top 100 in Books) #1 in [Books > Medical Books > Medicine > Surgery > Orthopedics](#) #14 in [Books > Reference > Encyclopedias & Subject Guides > Medical](#) #17 in [Books > Medical Books > History](#)

## Customer Reviews

Bought for Anatomy class and very happy I did. It is very detailed and the photos and colors are vivid and labeled well. It is an excellent study tool. I 3-hole-punched mine so I could put it in a binder. That was very helpful to me. I would recommend this for anyone studying Anatomy, or even Physiology, especially for the price.

I am a huge fan of the BarCharts and have many. This one is nicely laminated, fits well in a binder or just by itself. They are great for a quick reference, supplementing your textbooks, or having in your workplace for a quick look. I do realize that in a world of Google some might think these obsolete. For me nothing can beat something tangible. I have not been disappointed with any of the BarCharts that I have purchased.

I ordered this to help my daughter with her anatomy and physiology class at college. She loves it. It

has great information and helps her study for exams. I definitely encourage anyone that is taking this course, or a similar one, to order this study aid. I purchased it with several other quickstudy guides and have reviewed them together with this same review due to it applying to all of them. The quickstudy guides are all great and are a must for busy college or high school students.

Hi this is a great product. I ordered 4 of these for anatomy students in addition to anatomy 2, joints and ligaments and the skeletal system, and only 3 out of 4 arrived and one of the 3 arrived bent. Please send 4th immediately

Good product and as advertised. Easy to read and well printed.

Nice review of systems

very helpful

This chart is so informative, that even a kid can learn about it. It simply explains a lot of information about the muscular system. I highly recommend this chart to anyone that is in the health field.
