Synopsis

Teens and pre-teens flock to any new offering from New York Times best-selling author Gordon Korman. Told through multiple viewpoints, *Ungifted* follows Donovan Curtis through his year at a magnet school for gifted and talented kids. Thanks to an administrative foul-up, the decidedly mediocre student Donovan finds himself enrolled in the Academy of Scholastic Distinction. Out of place and out of luck, Donovan joins the robotics team. And while he learns a few lessons from his gifted classmates, he also teaches a few of his own.

Customer Reviews

This would be a great read a loud book for fifth or sixth grade. It has humor but also does a good job of showing students how to be kind and accepting of others that are different than us. Quick fun read.

Required summer reading for my son's English class. Arrived in good condition and on time. He enjoyed the story enough that he read it through in just two sittings. Anything that can distract from video games must be a pretty good read. :)

Ungifted is a great book for kids who are fan of Gordon Korman's books. It is mainly about a kid named Donovan Curtis, not just any old kid, an ungifted kid. He was accidentally sent to the gifted academy at Hardcastle Middle school. But nobody knows about that. The book has many great parts like when Donovan hit a tomato at a statue of Atlas's behind and the globe fell and shattered the glass of the gym. Does Donovan get expelled from school? Read the book to find out.

I chose 5 stars because this book was a funny, very adventurous book. What made this book unique was that the chapters were their point of view, not just "Noah discovers Youtube". I would recommend this book to anyone who has a taste for adventure. If you are a teacher who is looking for a book to read to your class, this book is the perfect book. I suggest 4th grade and up to read this. I like the Daniels because there are the kind of class clowns you would see in every school across America. The main idea of this book is to speak up for yourself.

Worth Buying!

This tells the story of a boy who grew up with very little, not a very good education, and a strange urge to mess up everything. It goes on to tell how he fixes everything, including academically talented kids who had no idea what a normal life was like, and all they wanted was to be normal, to make a mistake for once, to live the life of a kid instead of geniuses. When they discovered Donovan, they received all of their wishes, and Donovan became something of a hero. He learned that you can not be that kid who laughs at someone because of who they are. He became the kid who protected people because of what they were meant to be.

Such a great book and so easy to read. I read almost all types of books and there are not that many that have made me laugh out loud. This one did! TOTALLY RECOMMEND IT for all ages. You feel like you are out there with the characters: kicking the world around, building robots, eating in the cafeteria, dancing. You finish the book and you find yourself smiling!

This book is one of my favorite books I've ever read! The only reason why I didn't give it 5 stars is because it was a little confusing on who's point of view the chapter was on at first but once I got to the middle I understood it better. I really think you should read this if you're "ungifted" (at least if you think you are) I recommend this book to 4th grade and up. I really enjoyed reading this book!
