Customer Reviews

Gareth Williams is well-respected in his field.

The text is very clear, the illustrations are helpful and the labs or activities are easy to understand and implement. The supplies needed are common and easy to obtain. I found the text too simplistic for the 9th grade level of biology that I teach; however, for an introductory life science (general biology and an intro study to the body) at the junior high or middle school level, it would be fine. Not too much reading, nice overview of topics and given in "bite size" chunks. (in other words, the chapters are not too long). I gave it a 4 because I was hoping for a more challenging text. I use the Biology A/AS level for my 12 graders as a Biology II course and was hoping for a strong entry level general biology text for my 9th graders. This is not it.

Quick, Clean, and in very good condition.

Super fast shipping! Item was exactly as described!
