Blood Cells: A Practical Guide

Synopsis

Blood Cells has been written with both the practising haematologist and the trainee in mind. It aims to provide a guide for use in the diagnostic haematology laboratory, covering methods of collection of blood specimens, blood film preparation and staining, the principles of manual and automated blood counts and the assessment of the morphological features of blood cells. The practising haematologist should find this book sufficiently comprehensive to be a reference source while, at the same time, the trainee haematologist and biomedical scientist should find it a straightforward and practical bench manual. Enables both the haematologist and laboratory scientist to identify blood cell features, from the most common to the more obscure Provides essential information on methods of collection, blood film preparation and staining, together with the principles of manual and automated blood counts Completely revised and updated, incorporating much newly published information: now includes advice on further tests when a specific diagnosis is suspected Four hundred high quality photographs to aid with blood cell identification Highlights the purpose and clinical relevance of haematology laboratory tests throughout

Book Information

Hardcover: 486 pages

Publisher: Wiley-Blackwell; 4 edition (July 5, 2006)

Language: English

ISBN-10: 1405142650

ISBN-13: 978-1405142656

Product Dimensions: 7.8 x 1.1 x 10 inches

Shipping Weight: 3.2 pounds

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Customer Reviews

"You can't get much better than this book. Get it and chain it to your bookshelf. An unchained copy is guaranteed to "walk" -- this book is that good." Doody Enterprises Inc "It is indeed a practical and excellent guide, which will be a very relevant resource and contribute to setting the standard in daily practice and training of haematology for many years to come." European Journal of Haematology

I buy every single book Dr. Barbara Bain publishes. She is a gift to anybody involved in hematology. Clear always, illustrated as one dreams of and to the point, to the point she can see from the heights of enormous experience not just any point! These are classics of the British medical literature that go beyond their content. The style the messages the way they are structured is light years ahead of our poor measly US or rest of the world English.

excellent book by BARBARA BAIN. the illustrations are just fantastic. even better is the lucid and specific description.
