21 Superfoods For The Elderly: The Top 21 Superfoods In Every Elderly Diet To Keep Them Healthy And Strong

Synopsis

When one hears the word superfood, food groups that are high in vitamins, minerals, phytonutrients, and antioxidants quickly come to mind. These foods are high in fiber content, and have typically low amount of calories. Superfoods are recommended for everyone, as we all need to eat foods that are high in nutrition in order to have a healthy body. The elderly will particularly benefit from these types of food as their condition can be very fragile and weak. Customer Reviews

Good suggestions, but I like the 21 Super Foods book better. A little offended that age 60 is considered elderly.

Anybody who has had any experience with the elderly won't need this book at all. Everything in here is just common sense. I found it to be a complete waste of time.

Not as thorough as I thought it would be. I already knew this information. I was looking for something more in depth.

Is a good resource on how to eat. I am still ready this book. a good tool for us that is over 65 and what we need to do

A lot of the information in this book I had already read, but was a good review. It is helpful information for anyone who wants to improve their diet whether by diet or by supplements. The superfoods are great additions.

Now that I am getting older it is interesting to learn about the best foods for the elderly. Much of the information I already knew but it never does any harm to refresh your knowledge.

This is a terrible book. I got the feeling the author has or had a sickly relative who required special care and she either cared for them or helped so that made her an expert on the elderly. She clumped together everyone over 50 as if they are all in the same shape. This is so poorly written I was only able to force myself to read about half the book. I am glad I didn't pay for it.
