McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

Using this book is a no-brainer - which is what I REALLY needed. My husband was just diagnosed with Type II diabetes, and his nutritional needs are critical. We are stationed in Germany and are in the process of moving. I was disheartened when I found that the military dietician is unavailable right now. Other books were confusing - trying to figure out 30% fat calories, etc. This book saved my

sanity! The spiral binding and split page design are FANTASTIC and the food is GREAT. Directions are concise and it's easy to prepare a menu and shopping list from the book. Best of all, we're getting nutritious, consistent, easy meals and snacks and half the work is done for us. Some of the books in the series even include smart choices when eating out at fast food restaurants - another bonus. When our doctor and nurses saw these books, they were AMAZED. My recommendation: get all five!

Even though the book was in plastic, it looked as if it had been around for a while--aging pages, corners dented. On a different note, cookbook itself was not exactly what I expected. Was looking for some good low carb recipes, and most of the recipes were not as low carb as I need.

use the book all the time great book to use for anyone, very easy to use

works fine.

Haven't used it yet, but plan to shortly. I have so many cookbooks that I had set it aside for the family recipes. However, now I NEED to use it because of borderline Diabetes.

Basic cookbook; nothing really unusual or unexpected.

The book itself was as described. packaging is odd and actually damages the soft cover of this book. Responds to e mails .I prefer smaller volume dealers though as questions can be answered in greater detail.

Very good recipes
