# Southwestern New Mexico Mining Towns (Postcard History Series)

## Synopsis

Spanish and American prospectors discovered gold, silver, and copper mines in southwestern New Mexico in the 1800s. This volume explores the further development of these mining operations into the early 1900s. During this time period, improvements in technology made mining profitable, and eastern corporations invested in New Mexico mines. World War I created a demand for copper, and this era saw the development of paternalistic company towns. Miners faced difficult and dangerous working conditions, but their lives improved compared to previous generations. Many of the towns and the people in southwestern New Mexico owed their livelihood, in whole or in part, to mining. Some of these places have disappeared entirely, some are ghost towns, and others are thriving communities.

## Customer Reviews

I was raised in Silver City and learned a considerable amount through fascinating pictures and well researched facts that solved many different questions I often had over the years. The editing and

research is first rate and the many historical pictures are worth every cent of admission. Highly recommend, few books if any concerning the Southwest "Land Of Enchantment" exceed this wonderful resource.

I downloaded this to my iPad...it's been fun to look through all the photos that have been compiled for this book. My mother's family lived in Silver City, and I kept wondering if my grandfather would be in some of those old pictures. Really nicely put together!!

The big mines and most common ones were covered. I was hoping to learn something of the lesser known mines kind of off the beaten path so as to speak.

Book is a compilation of post cards dating back to the days when mining was an active industry in New Mexico. Would be of interest to post card collectors and early mining enthusiasts.
