Suriname Discovered

Synopsis

Surinam Discovered brings us a huge variety in sights and colors, found in few other countries. This is remarkable as Surinam, compared to most other Latin American countries, is quite modest in size, not to mention population: 500,000 inhabitants. The question therefore arises: to what does Surinam owe this overwhelming wealth and diversity? Largely, this is thanks to the physical properties of the country; more than 80% of it is unspoiled nature, specifically tropical rainforest. The wealth and pureness of the Surinam inland – much of which has been declared a nature reserve – is, compared to other tropical countries, spectacular.

Marco de Nood is a Dutch photographer who has frequently visited Suriname and has crossed the country many times by helicopter, Cessna, canoe, and on foot. His exciting trips to uninhabited areas have resulted, for the first time in Suriname's history, in an adult photographic and text book that does not know its equal.
