# Barron's Anatomy Flash Cards, 2nd Edition

## Synopsis

This attractive, newly designed set of Barron's Anatomy Flash Cards makes an ideal study aid for med school students, nursing students, and health care trainees who are preparing for tests. Each card pictures a human body part labeled with its medical name, location in the body, and function. A total of 265 4" x 6" cards show muscles, bones, and organs, and are color coded according to their general function in the human body. An important new feature in this second edition is a related Internet resource that contains electronic color images of each flash card. Students can now connect to Barron's special anatomy Web site and enter a unique code allowing them access to the interactive Web site. Once logged on, students can use the site's interactive technology to test themselves on every detail contained on the cards, and even create playlists of particular systems or areas where they require further study. The cards come boxed with a full-color, anatomically accurate poster that shows the human body and its major parts, as well as a toggle so cards can be pulled out and studied on-the-go. The poster unfolds to size 11 3/4" x 16 1/2".

## Book Information

Cards: 264 pages

Publisher: Barron's Educational Series; 2 edition (August 1, 2008)

Language: English

ISBN-10: 0764161598

ISBN-13: 978-0764161599

Product Dimensions: 3.8 x 4.2 x 6.2 inches

Shipping Weight: 2.6 pounds

Average Customer Review: 4.5 out of 5 stars 155 customer reviews

Best Sellers Rank: #115,370 in Books (See Top 100 in Books) #28 in Books > Education & Teaching > Higher & Continuing Education > Test Preparation > TOEFL & TOEIC #231

## Customer Reviews

Kurt Albertine, Ph.D., is Professor of Pediatrics and Adjunct Professor of Medicine and Neurobiology at the University of Utah School of Medicine in Salt Lake City, Utah.

I bought these for my husband's Anatomy and Physiology course. These cards are a great way to test your knowledge of the course material and keep studying in the areas that you are lacking. He really finds these cards helpful as A and P is a pretty tough and intense subject matter covering a lot of material in a short time.

The cards did not include the integumentary system, were information dense making cram sessions difficult and what is up with the frayed cord it comes with? It is so flimsy I had to get a D-Ring to put the cards on. Nice try Barron's.

I love the flash cards. I am learning so much. I give props to the author of the cards. I am learning my anatomy so well. It's very easy to understand. Makes learning anatomy so much fun. Every detail is so clear. I picture myself looking inside the human body. It is definitely a blessing to learn with ease. I learn much faster with visual notes. I specifically pay attention to every detail. I love the way the cards are numbered. You can easily place the cards back to their positions. It is absolutely amazing to me. I am going at my own pace. I don't feel pressured to learn. I am taking my time. I want to know all about the human body. The flash cards are my "saving grace." I learned anatomy in school; however, if you don't keep it up, you will not remember. I am so glad I had this opportunity to study. I am 62 years old. I really feel privilege to be able to do this. is a very good website to purchase products. In my opinion, It is the very best. One day, I hope to make use of my education in anatomy. Thanks to , I will be able to fulfill my dreams. I went to Surgical Tech School. I graduated with a 3.98 grade point average. Right after I did my internship, I got sick. I never got a chance to get my job in the operating room. This is a come back for me. My father became ill. I promise him that I would take my test and get my good job. My father passed in November of 2010. I was devastated. I know that God will answer my prayer and grant me the opportunity to live my dream. Studying The Anatomy Flash Cards give me hope that someday I will be able to keep that promise to my father. I have a lot of Faith in God. I know that I will do it. Thank you !

Pretty effective learning tool when used in conjunction with other sources like texts and lectures. Also good as a refresher for medical students and artists and those interested enough to study them for exercise or health reasons.

I bought this as to help me memorize muscles and their functions, origins, insertions and innervations. Very helpful!

I like these. I wish they had more views on certain body parts. Some are overwhelming with how many things they point out on a single card. I have found them helpful though and I'm glad I purchased them. I definitely didn't want to make them myself.

These flash cards are great! They really help with my Anatomy class and are detailed enough without being overwhelming. The only problem I had was there was a duplicate card instead of the next sequence card I needed. I made do without. It was just weird.

I bought these after taking my first anatomy lab exam, and I wish I had known about these sooner! They were very helpful to quiz myself with as well as being quizzed by someone else. Anatomy is a lot of memorization, and these cards helped immensely with that without having to spend so much extra time making my own flash cards and instead spend that extra time studying and memorizing. They had almost every thing I needed on them, so I would definitely recommend these!
