The Timber Press Guide To Vegetable Gardening In The Northeast (Regional Vegetable Gardening Series)

Synopsis

Growing vegetables requires regionally specific information—what to plant, when to plant it, and when to harvest are based on climate, weather, and first frost. The Timber Press Guide to Vegetable Gardening in the Northeast tackles this need head on, with regionally specific growing information written by local gardening expert, Marie Iannotti. This region includes Connecticut, Delaware, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. The southernmost parts of Ontario, New Brunswick, Nova Scotia, and Quebec are also included. Monthly planting guides show exactly what you can do in the garden from January through December. The skill sets go beyond the basics with tutorials on seed saving, worm bins, and more.

Customer Reviews

“Invaluable advice for growing your own food.” —New Living Magazine

“The writing here is as crisp as the layout, which uses colored page edges and a simple, slightly-New Englandy sense of style to get it all, it’s hard to think of anything NOT covered here. . . and yet there’s no sense of the text book in these pages, and only that homey feel one gets while actually gardening. Nicely done.”

—Woodstock Times
“This guide to gardening in our neck of the woods covers all the basics, one month at a time.” —Cape Cod Times
“This book is

everything a backyard gardener could want in an instructional guide. . . . Whether you are a newbie gardener or a gardening veteran, there will be something to learn with this book. [The Revolving Bookcase](#)

Matchstick green beans, spicy radishes, leafy greens, and fresh snap peas are just a few of the harvest delights awaiting gardeners in the Northeast. Long, hot summers and cool, crisp falls grant northern gardeners a growing season capable of yielding an ever-changing menu of seasonal food. But how do you use that hot summer weather to grow the sweetest tomatoes? Which months are the best for sowing squash or carrot seeds? And during the long winter months, how can you extend your bountiful harvest? Marie Iannotti answers all these questions and more while covering the many eccentricities of gardening in the Northeast. Monthly planning guides show exactly what you can do in the garden from January through December. The skill sets go beyond the basics with tutorials on seed saving, foiling pests, and working with worm bins. Also included are a comprehensive gardening primer and an A to Z of edibles—a detailed, invaluable source for the region's tried-and-tested varieties. Whether you are just starting your season or looking for ways to extend it, this is your guide to producing a bountiful, year-round harvest in the Northeast.

I really like this book so far. It's laid out and easy to follow. I have never had a garden before of any size and this book is definitely proving useful in my planning efforts.

I am a beginner gardener. This lays things out nicely for a novice like myself. Month to month planning guide with instructions with supplemental info on all aspects of gardening, from seed to seedling to the necessary components to ensure a healthy garden. Couldn't be happier!

It is well written and I have a hard time putting it down, very helpful for gardening in my region.

Great item, good price, fast delivery. Would recommend this seller.

Book looked great! It was a gift to some friends.

Good to have info specific to our region....

great value and speed! Thanks

This was an enjoyable read. Being specific to the Northeast, this book has been very helpful when getting my garden started. The plant-specific growing strategies and growing charts are a great go-to reference guide.
