# Machine Age To Jet Age, Vol. 2: Radiomania's Guide To Tabletop Radios 1930-1959, With Market Values)

## Synopsis

Machine Age to Jet Age is a continuing series which documents, pictures and provides market values for collectible vintage radios. Each volume is a supplement/companion to the others in the series, with all different items in each. Radios are individually pictured, described and valued, and are organized by manufacturer and model number. This series has become the most widely used and referenced resource of its type in the vintage radio collecting hobby. There are currently two volumes available with Volume 3 to be available in September, 1999. Volume Two of the series covers the period 1930-1959 and individually pictures, describes and values over 2,700 tabletop radios. The years 1930-1932 have been added to the scope of the series so as to encompass cathedral type radios which dominated during these years. Volume Two also includes over 190 color plates with sections on different varieties of cabinets (i.e., catalin, bakelite, plaskon, beetle, chrome grilles, etc.). In addition, the narrative provides useful information about collecting on the internet, categorizing and valuing vintage radios, clubs and events, and many hobbyist resources. 8.5" X 11" format. 368 pages.

## Book Information

Paperback: 364 pages

Publisher: Radiomania Publishing; 2001 Updated edition (1997)

Shipping Weight: 2.3 pounds

Average Customer Review: 5.0 out of 5 stars 3 customer reviews

Best Sellers Rank: #1,130,634 in Books (See Top 100 in Books) #20 in [Books > Crafts, Hobbies & Home > Antiques & Collectibles > Radios & Televisions](#) #843 in [Books > Crafts, Hobbies & Home > Antiques & Collectibles > Antiques Care & Reference > Reference](#) #1868 in [Books > Reference > Encyclopedias & Subject Guides > Antiques & Collectibles](#)

## Customer Reviews

'...a worthy supplement to the collector's library.... [has] much to commend it to both radio dealers and collectors...' -- Antique Radio Classified'...the most valuable [radio] collecting resources I have found....A necessity for any serious radio collector... -- California Historical Radio Journal

Mark V. Stein is a noted authority on art deco and machine age radios. He has been collecting and selling vintage radios for the past 15 years. Through his catalogs and website he has sold thousands of vintage radios over the years. He currently maintains a website which focuses on high-end art deco radios and related items ([www.radiomania.com](http://www.radiomania.com)). Mark received his Masters in Business from Johns Hopkins University in 1984. He currently resides in Maryland with his wife and two daughters where he dedicates his time to researching, authoring and publishing books about vintage radios, clocks and other industrial design antiques and collectibles.

A dated book and a few examples are depictions or drawings instead of pictures. Only 16 pages are in color. This book however has much info and at least can give you an idea of what a particular model looks like. Therefore it is an asset to the radio collector.

This is the bible of radio collecting. The price estimates are not always accurate because the book is somewhat dated (1990's I think). But it will tell you what a radio is and if it's valuable or not. Stein did a good job with this one!

very good book it is very handy with the radio collector a list or the radios you are wanting
