# Everything You Need To Ace Math In One Big Fat Notebook: The Complete Middle School Study Guide (Big Fat Notebooks)

## Synopsis

It's the revolutionary math study guide just for middle school students from the brains behind Brain Quest. **Everything You Need to Ace Math . . .** covers everything to get a student over any math hump: fractions, decimals, and how to multiply and divide them; ratios, proportions, and percentages; geometry; statistics and probability; expressions and equations; and the coordinate plane and functions. The BIG FAT NOTEBOOK series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for each main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun and are the perfect next step for every kid who grew up on Brain Quest.

## Book Information

I love using this as part of our homeschooling curriculum! It simplifies so much. We use youtube channels and other resources also. I have used it to brush up on math subjects before we get into something new. I like the question and answer page at the end of each chapter. Math is my weak spot when it comes to homeschooling. This book is easy for me to understand. My kids are in 6th grade, and I'm in my forties. Hope that helps!

A good series of books.

Great resource for teaching.

Great visual book for students and teachers!

This book is exactly what the teacher uses and it is helping him tremendously!!! Thanks!!!!

I bought the whole series of books to have at home after my principal purchased them at the school I work at. They are fantastic and my kids love them. My 12 year old son asked if he could have his own copy of the Math one, he loves it so much.

My daughter uses this book to review any lessons that was confusing in class. She says it has helped her to grasp challenging concepts.

My 7th grader loves having this resource! It's extremely useful!
