Soonish: Ten Emerging Technologies That Will Improve And/or Ruin Everything

Synopsis

From a top scientist and the creator of the hugely popular web comic Saturday Morning Breakfast Cereal, an illustrated investigation into future technologies. What will the world of tomorrow be like? How does progress happen? And why don't we have a lunar colony yet? In this witty and entertaining book, Zach and Kelly Weinersmith give us a snapshot of the transformative technologies that are coming next - from robot swarms to nuclear fusion powered-toasters - and explain how they will change our world in astonishing ways. By weaving together their own research, interviews with pioneering scientists and Zach's trademark comics, the Weinersmiths investigate why these innovations are needed, how they would work, and what is standing in their way.

Book Information

Print Length: 368 pages

Publisher: Particular Books (October 17, 2017)
