Swanson's Family Medicine Review, 8e

Synopsis

The 8th edition of Swanson's Family Medicine Review continues this bestselling resource's long tradition as the most effective review tool available! Case histories and multiple-choice questions equip you with the most current developments and information in family medicine, offering all the assistance you need to maximize your preparation for the ABFM exam. Stay up-to-date in the area of treatment and management with enhanced discussions throughout. Equips readers with the information needed to confidently prepare for the American Board of Family Medicine exam. Includes nearly 2,500 case-based questions and answer rationales, newly updated to reflect the most current developments in practice. Expert Consult eBook download included with purchase. This enhanced eBook experience allows you to answer questions interactively and check your answers on any electronic platform. Chapter Summaries offer a quick review of the concepts—great for last-minute exam preparation. Open-ended Clinical Case Management Problems in each chapter provide additional opportunities for articulating your understanding of key topics. Features the most current information on concussion management, palliative care, pain management, and more. Allows you to earn up to 75 CME Credits online through Rutgers Robert Wood Johnson Medical School.

Customer Reviews

"As the scope of practice in family medicine is broad, this book provides a wide range of cases that

a family medicine physician must understand for their daily encounters with patients. This is a worthwhile study aid for those preparing for the family medicine certification examination."

-Vincent F Carr, DO, MSA, FACC, FACP (Uniformed Services University of the Health Sciences)
Doody's Score: 90 - 4 Stars!

Serves as a comprehensive overview of Family Medicine in case study format however there are numerous miskeyed answers and some blatantly incorrect statements. I feel like this version did not get edited well at all.

Good discussions of major topics. Just make sure you review the actual discussion in the answer and not just the letter answers as there are quite a few errors.

I have been reading medical journals, books, board review questions every single day for years. Naturally, I have gone through many (probably most) of board review books. I have read every single page of Swanson's Editions 6th and 7th. (I do not recall if I have read 4th and 5th editions since I no longer have these. By getting this 8th edition, I have been wondering if previous editions have been so poorly written and edited. It would be so difficult to read this book while I consider many questions as ridiculous! Each Question has 5 multiple choice answers. Answers of most of questions are none of the above or all of the above! Some answers are just plain statistics which we do not even care. One of question in the constipation in the elderly it's the following: an old man with metastatic cancer has increased pain. His pain has increased despite of increasing the dose of morphine. They do not even mention the location of the pain. They expect us to think constipation is the cause! It is very hard for me read this book everyday especially I just finished Graber and Wilbur's which was so good. I would recommend G and W instead of this trash. I do not think it worse 70 US!

the editors need to look over the offered choice of answers in several parts of the book. several instances of picking an option as the right answer and explaining away the reason why it is a wrong choice in the body of the text!!!

Have used this to study for boards since residency. Great study aid

I bought this to brush up on new material and I think it is perfect!

I have been using this as a study aid throughout Family NP school to quiz myself for boards. I think it's awesome!

Excellent. Relevant and on the test. The app is great. Use this book for your boards.
