An award-winning instructor and best-selling author, Elayn Martin-Gay has taught mathematics at the University of New Orleans for more than 25 years. Her numerous teaching awards include the local University Alumni Association's Award for Excellence in Teaching, and Outstanding Developmental Educator at University of New Orleans, presented by the Louisiana Association of Developmental Educators. Prior to writing textbooks, Elayn developed an acclaimed series of

lecture videos to support developmental mathematics students in their quest for success. These highly successful videos originally served as the foundation material for her texts. Today, the videos are specific to each book in the Martin-Gay series. Elayn also pioneered the Chapter Test Prep Video to help students as they prepare for a test – their most “teachable moment!” Elayn’s experience has made her aware of how busy instructors are and what a difference quality support makes. For this reason, she created the Instructor-to-Instructor video series. These videos provide instructors with suggestions for presenting specific math topics and concepts in basic mathematics, Prealgebra, beginning algebra, and intermediate algebra. Seasoned instructors can use them as a source for alternate approaches in the classroom. New or adjunct faculty may find the CDs useful for review. Her textbooks and acclaimed video program support Elayn’s passion of helping every student to succeed.

The book did come within the 2 day shipping time frame since I also signed up for a trial of Student. The book is missing the cd that should come with it. The front cover is coming apart at the hinge. The first few pages are also ripped out. However the rest of the book and pages seems to be in good shape and that's what matters most. I did find the rental to be one of the better rentals available for college students. It was the cheapest I found and also allowed for the longest time to rent it compared to other options and websites.

Purchased for my son. The CD was included. I saved more than \$120.00. I could not believe the great saving, initially I thought the posted price was an error. All pages were intact, no damage. My child was happy and so was I after the great saving.

It was required for my daughter’s class, so I won’t review the technical aspects of the book. However, I will say, it was over \$140 cheaper than the bookstore was charging for it! Thanks - a used textbook - especially when it’s not one you’ll likely keep for a lifetime - is a great deal!

This is a text book. I am not reading it for my enjoyment. It met my standards....because it is a textbook...it does exactly what you buy it for.

Great book, will use next semester

Although I got the fifth edition of the book instead of the 6th that the teacher recommends, and some of the exercises are different, I'm still very happy with this purchase. The price was great, about \$140 less than the new edition, the book is in good condition and the delivery was super fast! I would definitely recommend this seller!

This book was a good price! Perfect for my math class. It helped me with my math assignment and for studying!

Great condition
