Abiotic Disorders Of Landscape Plants

Synopsis

This manual contains a wealth of information to help you diagnose abiotic disorders in landscape plants disorders caused by environmental, physiological or other nonbiological factors. You'll learn how to diagnose injury symptoms from over 20 different abiotic agents including water deficit, nutrient deficiencies, salinity, pH, sunburn, air pollution, herbicide and other chemical phytotoxicities, mechanical injuries, lightning, wind, and hail. You'll also learn how to develop a step-by-step diagnostic strategy. Included are strategies, techniques, and tools you can use in diagnosing plant problems, common injury symptoms and their abiotic causes, and plant traits that can resemble abiotic disorders. Illustrated with 319 color photographs and 38 tables, this book is a "must-have" for the library of every landscape professional.

Customer Reviews

An excellent resource for the lay or professional gardener. Great tables, photographs, and information about problems most frequently seen and misdiagnosed as disease in the hobby and business of gardening. Though written from California, applicable to trees and shrubs on the opposite coast of VA. Combined in one volume is information on pH, planting, nutrient and other environmental problems which -when recognized- should reduce unnecessary application of pesticides and result in healthier plantings. This is the only reference of its type that I've found in nine years professionally advising homeowners, master gardeners, and other professionals.

As a second year horticulture student, required texts can often be difficult to read if one does not have a basic understanding of the subject matter. I found that these books read like instruction manuals, and didn't keep my attention well. Abiotic Disorders of Landscape Plants is well written and has pertinent information, easily to be entreated. Having no previous knowledge of the subject did little to hinder any understanding I am gaining from reading this book.

thanks

Required reading

Excellent Reference!!

Outstanding reference book

Great condition for the price.
