Clicker Training For Clever Cats: Learning Can Be Fun!

Synopsis

There is a method of learning to which no mammal is impervious; not even cats. It is called "classical conditioning," and is used in a very specific way as part of clicker training. Every click results in something positive for the cat: a treat, a cuddle, a favorite game. Because cats are intelligent, they quickly understand what kind of behavior gets them a click and a reward, and they will experiment in order to find out what else might work. This manual explains what classical conditioning involves, why it works with every cat, how to avoid mistakes, and how to use rewards properly and develop chains and sequences of behavior, as well as small tricks.

So so

Great book!

Good and practical read. It really works!!! Many thanks to the author!!

great

I was determined to have a better behaved cat, so I bought this book & a pack of clickers. My husband thought I was nuts. NOW he thinks I'm a genius! Our cat has already learned several commands very quickly by following the steps in the book. He sits for his food every time we feed him. He will sit on demand & now he jumps on demand into our arms! I started training him the beginning of April, so I would say in less than 6weeks he learned these skills. We are now starting to teach him to COME when called & next will be tricks! I am just amazed that you can train a cat to do ANYTHING, but it really is easy...it's all conditioning w/food rewards. One way I found I REALLY got my cat's attention was instead of treats I cut up little pieces of white meat chicken & WOW that really IS a treat to him, so he paid attention!

Quite an eye opener. I didn't think this would work, but used the method and my cat now sits, goes up and lays down on command. I had initially purchased because the cat and I were having trouble bonding and this was a fantastic way to spend positive time together.
