Customer Reviews

I got this book because my brother has leukemia. It is easy to read and very informative. I keep this book in my purse should anybody ask about this kind of cancer. I brought four other books on , but this is the best.

This is a very well written and informative compilation of information. Anyone with the condition or with a loved on or friend similarly afflicted should read it.

If you've been diagnosed w/Leukemia BUY this book. It will answer ALL your questions. It will guide you through the process of how to deal with what to do next, how to deal with ALL that's going on. In most cases you have to move fast in treatment so you don't have much time to contemplate how to treat & trust in your doctors is important, but it is your choice & you have to understand what their even talking about - this book helps you understand the doctors words. BUY IT.

This is a very informative and helpful book. When you need this information, Johns Hopkins is the place to find it.
