Introduction To Agricultural Accounting

Synopsis

Introduction to Agricultural Accounting is written specifically for accounting information related to agricultural operations. Typical issues and situations unique to the agricultural industry, and relevant examples of accounting are presented throughout. The accounting procedures offered build on current practice in agriculture. Cash-basis accounting, prevalent in many farm operations is explained in the text through an accrual-adjusted system, providing more accurate information for the measurement of profitability of the farm operation. Figures and tables are presented throughout for easy reference, and to simplify accounting practices.

Customer Reviews

This is a good idea. Agriculture accounting is an important component of the success of an Agriculture business. At my level, I am looking for a book that can give a practical approach to this subject.

Barbara Wheeling is an Assistant Professor in Accounting at the Montana State University-Billings. Barbara is a Certified Public Accountant and is a member of Pacific Northwest Farm Business Management Instructors. She has contributed to Alternatives to GAAP for the Agricultural Industry, Today's CPA, Agricultural Accounting: A Case for Asset Revaluation, and Accounting for Agricultural Producers monograph for Bureau of National Affairs, Washington, DC.

I personally thought this book sucked. It is black and white and the text doesn't change so it is had

to go back in and out and find things when your flipping pages to reference items. It also is vague on information in the questions part of the chapters, and refers you to information you are not sure where to find in the chapter. I bugged my college instructor a lot on this book. For the price it gets the job done, but I'm glad to be done with needing this book. Hated it!

excellent

well done.

Great

I work in the farming business and this looks much better than the books available in the library.
