## Synopsis

This updated biology review book covers all topics prescribed by the New York State Board of Regents and serves as a valuable companion to high school biology textbooks. Two comprehensive study units cover the following material—Unit One explains the process of scientific inquiry, including the understanding of natural phenomena and laboratory testing in biology. Unit Two focuses on specific biological concepts, including cell function and structure, the chemistry of living organisms, genetic continuity, the interdependence of living things, the human impact on ecosystems, and several other pertinent topics. Question sets are included in each section of the book and are accompanied by explanations of answers and wrong choices. Two recent Regents exams are also included with all questions answered. ## Customer Reviews

It is a regents review book so there isn't much to say. I purchased this for my son who is taking the NYS Living Environment exam this year. He seems to spend more time using the review sites on his laptop rather than what is in this book. I guess that is a sign of the times. I looked over the book and it does have great sections that briefly explain the material covered on the exam. There are also practice exams and questions as well.

This has great selection of practice questions but the organization of the topics is confusing. The earth science title in this series is more helpful.

We thought about getting this book from the library but my son was dedicated and wanted to track his work in the book. He has this book in his hands more than his phone. Amazing.

good as a supplementary book. You still need the text book to fully understand the concepts.

This book help my daughter every time that she needs revise for a test I am happy because she has a extra support to understand science. My daughter has extra support with this book she understand better her class.

I am so happy I purchased this item for my daughter for school. Not even Barnes & Noble had the newest edition available the way did. Thank you for being a great place to shop & having the newest items available.

It has all the information (good products!)
