F.A.S.T Exam Prep: FlightBridgeED - Air - Surface - Transport - Exam - Prep

Synopsis

2nd Edition Printing! This is the most UP TO DATE exam prep book on the market. Current 10th edition CAMTS standards and test prep questions based on the newest FP-C, CCP-C and CFRN exam content. Preparing for advanced certification exams isn't easy! It requires planning ahead, studying hard and having quality materials from experienced educators to guide you. This 2nd edition book includes over 350 critical care level questions, rational and test tips, designed to provide you with practice in the types of questions typical of the CFRN, FP-C or CCP-C exams. In addition, the questions in this book are a sampling of topics used to drive advanced certification test banks, allowing you a great way to review. This book was authored by the same quality educators that bring our industry-leading CFRN/FP-C Exam Review & Advanced Practice Update book. Combined these books for an unbeatable set of advanced certification review tools! Go to www.flightbridgeed.com for review course dates and locations and explore our free podcast series!

Customer Reviews

Eric Bauer is the founder | CEO and lead educator for FlightBridgeED, LLC. He has worked in the EMS field for 24 years with the past 13 years spent in the HEMS industry. Eric is an internationally recognized author, speaker and educator and holds a Bachelors Degree in Business - Health Care Administration and a Masters of Business Administration - MBA. He's currently working on his Doctoral Degree Ed.D. in Higher Education | Adult Learning. He currently works as a Clinical Education Manager for the largest air medical provider in the world. He has spoken on many critical care topics as an educator, and has authored and published 96 critical care podcasts related to the

HEMS industry, with over 1 million downloads in the first 4 years of publication. He has developed a passion for all things ventilator management and is asked to consult on the subject on multiple levels related to pre-hospital EMS and HEMS around the world. His most recent work has focused on writing and publishing the #1 Best Seller: Ventilator Management - A Pre-Hospital Perspective". His love and passion for teaching is the founding basis for establishing FlightBridgeED, LLC!

This is the first review that I have ever left on . I deemed it very important as I think other reviews aid strongly in choosing review material. My experience is from the FP-C. I found the material listed to be the closest to the 3 books that I used to review. After about 7 days of review, it was very clear that the material Bauer puts forth is well researched, well thought out, and very challenging. I put the other two books aside which included ACE STAT and Back To Basics and focused highly on this material and used the Back to Basics as a back up for questions only. I listed the other 2 books because I had a lot of anxiety about which material to study. I had no problems with other practice questions after review with this material. Also, make sure you have the SECOND EDITION as there are very few errors on that one. I do agree that there are about 2-3 questions that do not match the answer. However, if we use common sense and read the explanation of the answer it is very clear where the mistake is made, which I would encourage you to do with any review that you purchase. I spent a lot of time in review with this material and found that it was EXTREMELY KEY for not only begin able to pass the FP-C the first time, but to add it to my personal library. I will not hesitate to share this material with anyone that is interested in not only "upping their game", but to use as a review for FP-C. Cannot recommend this enough! Further, as a side note, I have sent Eric numerous emails asking lots of questions. I have always gotten a response within the hour, including a Sunday morning about 9 AM.

Great information but not even close to any questions in the FP-C or CFRN! This is written very differently than any other study material for both of these tests. Had I studied this book and relied on its contents I would have failed. Back to Basics by Orchid Lopez and the Ace Sat are your best choices. Don't forget the Astna Air & Medical transport book by Renee Hollarman this is the gold standard for transport.

I used this book to prepare for taking the CFRN. I study best by going over questions. This book has lots of questions that make you think your answers through before you pick an answer. He give the rationale for all the correct answers!!! Love that!! I was able to pass my CFRN....and I have no flight

experience!!!

Excellent exam prep book. I used it for my FP-C exam recently with great results. I recommend it to anyone looking to take the next step in your career. Thanks Eric!
Klint W. Kloepping, FP-C, NRP, CICP, C-NPT

good deal. fast shipping.

I found this book similar in content to many of the other books on the market. The problem with this one is that many of the answers/rationale do not match up with the correct answers. Someone needed to spend a little more time with editing. My favorite of the 5-6 that I used to pass the CFRN Exam was by a young lady named Orchid Lopez and is called Back to Basics Critical Care Transport Review. Honestly none of the books I used "nailed" the CFRN exam but her's came the closest.

Great book, I could nit have passed the test with out studying this book. Really!

very good and informative book. Using it to study for my exam. Arrived in adequate time
